

Professor: Marcos André Pisching
Matéria: Serviços Web
Aluno: Cristian Mariano

Projeto Final

Prints da utilização do método Post:

Nesse caso professor eu tive algum problema que não identifiquei na consulta Post provavelmente fiz errado alguma coisa na pesquisa.

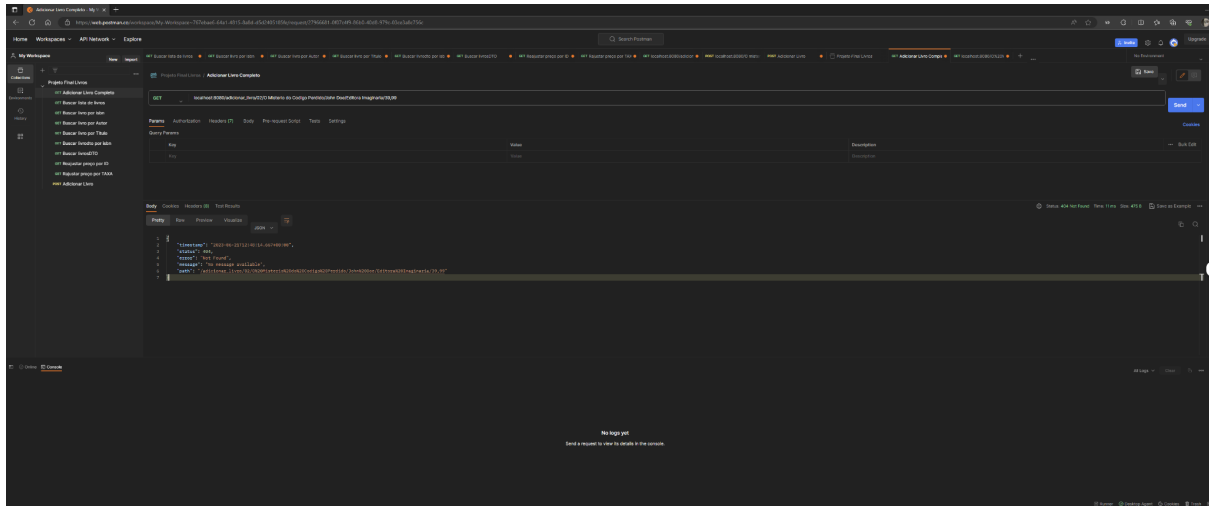

```
(value = "/adicionar_livro", method = RequestMethod.POST,
```

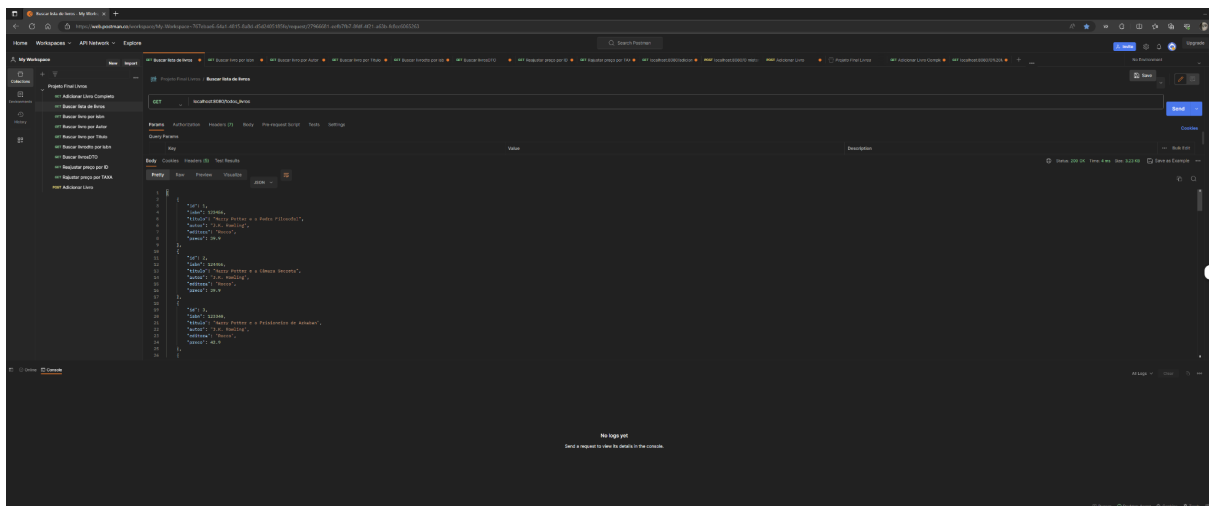

Prints da utilização do método Get:

Mesma coisa neste caso, o professor estava dando um erro que não identifiquei qual era, mas também acho que é na pesquisa.

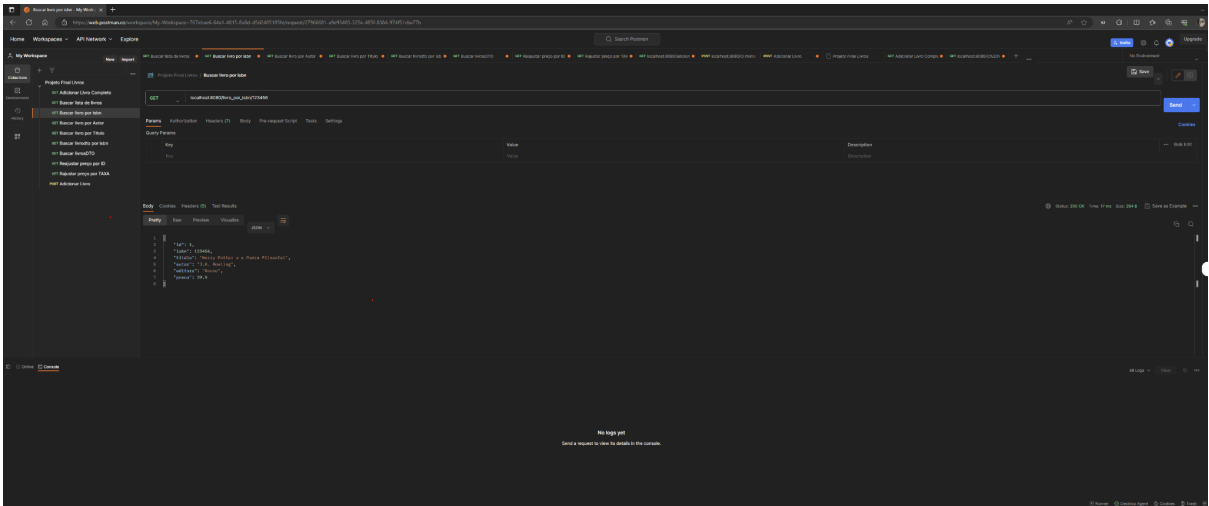

```
(value =  
"/adicionar_livro/{id}/{isbn}/{titulo}/{autor}/{editora}/{preco}", method =  
RequestMethod.GET)
```

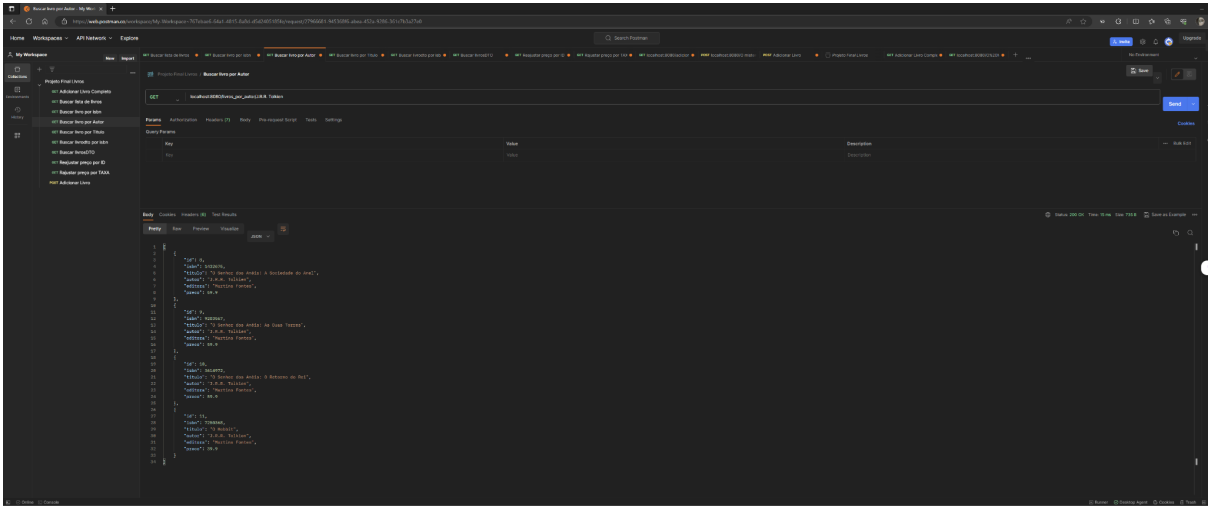

```
(value = "/todos_livros", method = RequestMethod.GET)
```

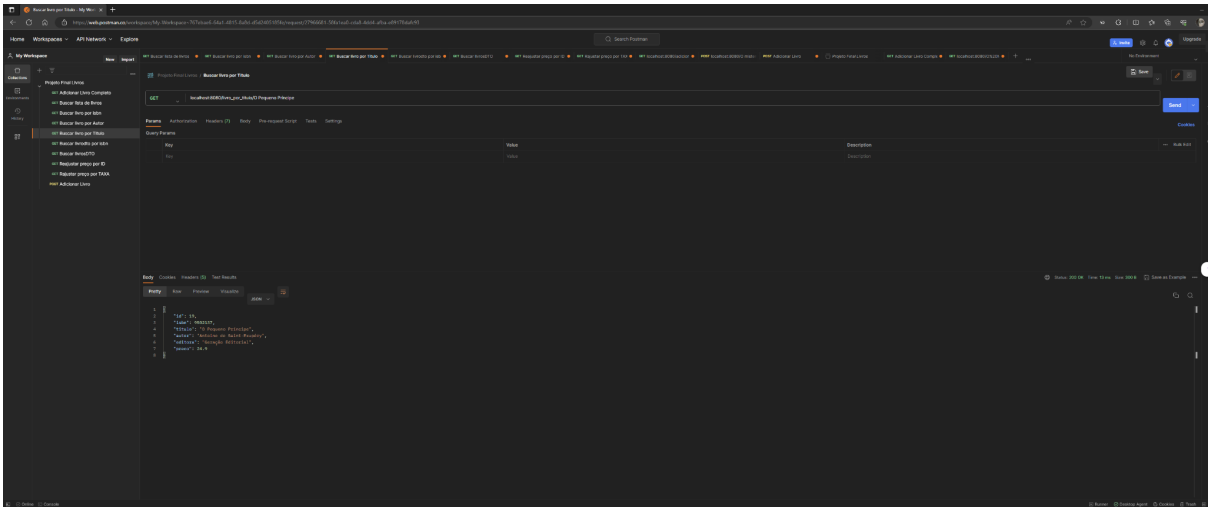

```
(value = "/livro_por_isbn/{isbn}", method = RequestMethod.GET)
```

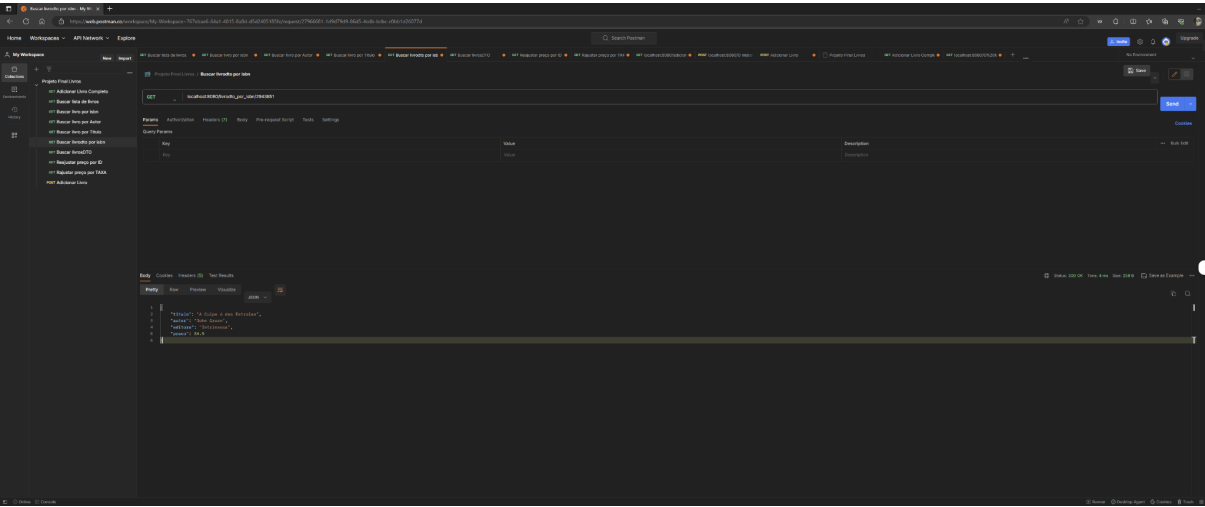

`(value = "/livros_por_autor/{autor}", method = RequestMethod.GET)`

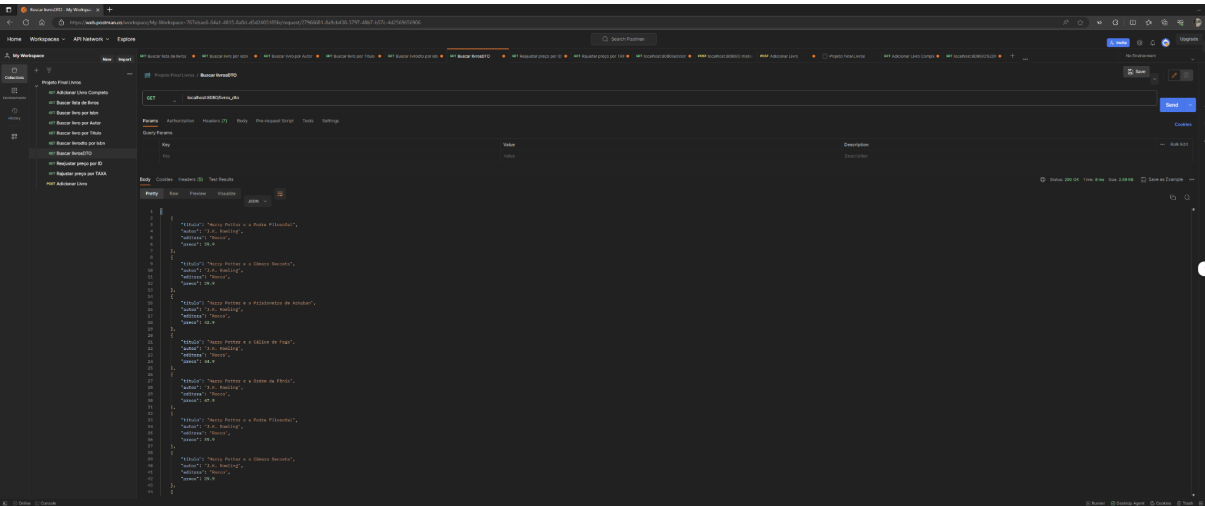

`(value = "/livro_por_titulo/{titulo}", method = RequestMethod.GET)`

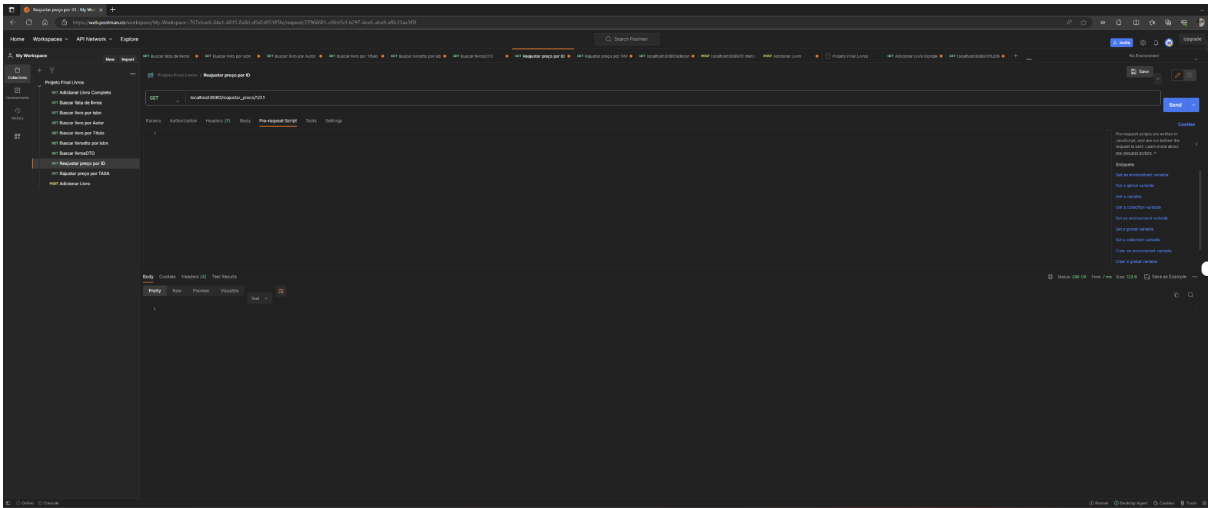

(value = "/livrodto_por_isbn/{isbn}", method = RequestMethod.GET)

(value = "/livros_dto", method = RequestMethod.GET)

(value = "/reajustar_preco/{id}/{taxa}", method = RequestMethod.GET)

`(value = "/reajustar_preco/{taxa}", method = RequestMethod.GET)`
